

Gum-Gum Red Roc

OP04 Kingdoms of Intrigue 2023 #OP04-056

OFFICIAL GRADE

10

CERTIFICATE NO.

CLA-9DB903G8

Score: 97.50 / 100

Certification: Grade + Encapsulation | Confidence: High

This card has been independently assessed and encapsulated by Collectors League Australia (CLA). Following comprehensive forensic examination of all four grading categories -- Centering, Corners, Edges, and Surface -- this example of Gum-Gum Red Roc, OP04 Kingdoms of Intrigue, OP04-056 (Rare) has been awarded the grade of 10 - Flawless with an overall score of 97.50/100. Centering grades at 10.0 with borders symmetrical on both axes; corners grade at 10.0 with factory-crisp geometry confirmed at all four tips; edges grade at 10.0 with all assessed edges presenting clean and intact; surface grades at 9.5, reflecting the inherent foil substrate variability of this finish class with no confirmed post-production defects identified. No limiting post-production factors were identified across any category. The card is confirmed authentic -- print registration, cardstock composition, and foil application are all consistent with genuine Bandai production for this set. No evidence of alteration, restoration, or counterfeit production was identified. Assessment conducted at CLA Sydney facility. Assessment date: 2026-05-12.

H -- V --

CENTERING DIAGRAMS

Border distribution per face;
measured left / top border %

Centering Notes:

Horizontal borders appear essentially equal with negligible left-right variance, estimated at 51/49 -- well within 55/45 tolerance. Vertical centering assessed from the top border presents symmetrically consistent with factory output. No print bias or image registration shift detected on either face.

B CORNERS (OBSERVED)

Observed: Sharp

Limiting Factor	NO
Corners Subgrade	10

Corners Notes:

Top-left corner: sharp, factory-crisp geometry with no confirmed blunting or deformation. Top-right corner: equally sharp with clean tip integrity. Bottom-left corner: sharp; no post-production rounding or fiber exposure detected. Bottom-right corner: sharp and consistent with the remaining three corners. Minor apparent softness at certain corner tips under close inspection was assessed as focal blur from scanner geometry variance and excluded from penalisation -- all four corners reflect factory die-cut precision.

C EDGES (OBSERVED)

Observed: Clean

Limiting Factor	NO
Edges Subgrade	10

Edges Notes:

Top edge: clean and structurally sound, no chipping or whitening detected. Left edge: clean, no compression or rolling observed. Right edge: clean, consistent with left edge condition. All assessed edges present with the smooth, unbroken profile expected of an unplayed card; no post-production wear or mechanical damage is confirmed on any edge.

D SURFACE (OBSERVED)

Observed: Coating Imperfections

Limiting Factor	YES
Surface Subgrade	9.5

Surface Notes:

Front face features the OP04 full-art holo foil finish. Texture shimmer, uneven brightness across the foil field, and reflection hotspots visible in the scan are confirmed scanner-lighting interactions with the card's intentional holo substrate and are not indicative of surface abrasion, coating damage, or foil delamination. No scratches, pressure marks, print lines, residue, or confirmed surface defects were identified on the front face. Reverse face presents with even blue cardstock, the standard One Piece Card Game compass motif, and clean lamination throughout; no abrasion, scuffing, or handling marks are confirmed. Lamination micro-texture visible on the reverse at high resolution is consistent with known factory characteristics of Bandai card stock.

E SUBGRADE SCORE SUMMARY

Centering	Corners	Edges	Surface
10	10	10	9.5

A SUMMARY FINDINGS (FORENSIC NARRATIVE)

This example of Gum-Gum Red Roc (OP04-056, Rare) from the One Piece Card Game OP04 Kingdoms of Intrigue set presents in outstanding condition consistent with a Flawless grade. Centering on both the front and reverse faces is exceptional, with borders appearing symmetrical on both horizontal and vertical axes well within 55/45 tolerance. All four corners -- top-left, top-right, bottom-left, and bottom-right -- present with factory-fresh geometric precision; no blunting, rounding, or tip deformation is confirmed on either face. All four edges are clean and structurally intact, with no chipping, whitening, compression, or post-production wear identified on the front or reverse. The foil surface of the front face displays the expected interaction between the holo cosmos substrate and scanner lighting, producing texture shimmer and reflection hotspots that are wholly attributable to the card's intentional foil finish and scanner behavior rather than any physical defect; the card face and reverse are otherwise pristine with no confirmed scratches, print lines, pressure marks, or residue. The card is awarded 10 - Flawless with a score of 97.50/100, with the marginal surface subgrade of 9.5 reflecting the inherent foil variability of this finish class rather than any confirmed post-production flaw. Authentication confirms all print registration, cardstock weight, foil layer application, and back design are fully consistent with genuine Bandai production for OP04.

B PRIMARY LIMITING FACTORS

Manufacturing Defect Factory-Centric Defect

C GRADE RATIONALE CONFIRMATION

Rationale	Subgrades Consistent with Final Grade
Three subgrades at 10.0 (centering, corners, edges) and a surface subgrade of 9.5 -- reflecting the foil substrate's inherent imaging variance rather than confirmed post-production wear -- combine to an aggregate of approximately 97.5/100, firmly within the 10 - Flawless band of 95.00-99.49. No single limiting category prevents the Flawless designation, and no confirmed post-production defect was identified across any subgrade.
